

WOBI PRESENTS THE EXCLUSIVE MASTERCLASS ON

# AI & THE FUTURE OF WORK with

# NATHALIE NAHAI

Author and psychology-driven technology strategist

#### In this masterclass you will learn:

- Explore how to foster trust, connection, and emotional resonance in a world increasingly shaped by AI and automation
- Identify blind spots in current AI adoption strategies that may erode creativity, ethics, team cohesion, or stakeholder confidence and create mitigation plans
- Discover how to integrate AI as a collaborative team member through frameworks rooted in values, context, and discernment

#### **ABOUT**

## Nathalie Nahai

### Author and psychology-driven technology strategist

Nathalie Nahai is a leading voice that explores the intersection of human behavior, culture, and emerging technology. With a background in psychology, marketing and digital strategy, she advises organizations on how to navigate the ethical, creative, and relational challenges posed by AI, having worked with leading companies such as Google, Accenture, Unilever, and Harvard Business Review, among others.

She is the author of *Business Unusual* and *Webs of Influence*, and the host of the podcast *In conversation with Nathalie Nahai*, where she explores themes such as consciousness, resilience, and the future of work.

## WEDNESDAY, JUNE 18th

## AI & THE FUTURE OF WORK

- Understanding agency: What AI lacks and why human discernment matters
- Human + AI collaboration: How to train, guide, and integrate AI as a valuable, aligned member of our teams and customer interactions
- Designing tech with trust: How to build ethical, emotionally intelligent strategies for a more connected digital future
- The risks of automation without reflection and how to preserve creativity, trust, and connection
